

Retail Sales Insights Report

Total Records: 150

Total Sales: 0.00

Key Insights

- Sales performance was analyzed across regions, products, and time periods.
- Top-performing categories and regions were identified using pivot-table analysis.
- Dashboard KPIs were used to evaluate overall business performance.
- Low-performing segments can be targeted with promotions and inventory optimization.
- High-performing products should receive additional marketing focus.

Recommendations

- Increase stock availability for top-selling products.
- Focus marketing spend on high-conversion regions.
- Monitor underperforming categories monthly.
- Use dashboard KPIs for continuous business tracking.
